We Deal with Your Insurance Company for You

We work directly for you, not your insurance company. We're your advocate to the insurer. We communicate with the insurance adjuster to obtain all the necessary approvals of covered losses on your behalf. All of our team's work is done in strict adherence to IICRC S-500 and S-520 guidelines. We never cut corners to save time or dollars at the expense of quality workmanship.

Farr West Disaster Damage Restoration Company

We provide full-scope disaster flooding clean up and restoration of your damaged or destroyed property. We complete all phases of cleanup, structural drying, decontamination, and repair and replacement of building components, fixtures, finishes, appliances, and contents. As a disaster restoration company, some key services we offer you include:

Fire Disaster Cleanup

The total annual national losses from commercial building and house fires are staggering. Smoke and soot damage and mold spread due to water used in firefighting further complicate the recovery work for homeowners and businesses as they try to recover from the disaster. Utah Flood Cleanup fire and smoke damage restoration company uses the industry's best commercial equipment, tools, materials, and processes for cleaning, decontamination, drying, and restoration of disaster-damaged buildings and their contents.

Water Disaster Cleanup

It can be overwhelming to see the destruction interior flooding from a burst water line can cause. It can destroy drywall, support studs, subflooring, floor joists, hardwood flooring, carpets, doors, electrical wiring, window frames, and building contents. As your water damage restoration company in Farr West, we arrive at your property quickly while there's still time to salvage much of the structure that will be lost if treatment is delayed. We assess needs and start water cleanup and get the structural drying process underway. We then fully restore your property's structure, finishes, and contents.

Sewage Disaster Cleanup

The uniquely horrifying risk of exposing people to an environment covered with sewage can only be avoided by careful management of a sewage disaster site. Black water flowing through your home or workplace can saturate everything with bacteria and contaminants carrying diseases and deadly viruses. As your sewage cleanup and decontamination specialists, we immediately secure the site, perform thorough sewage water cleanup and decontamination, structural drying, and rehabilitate the structure, fixtures, and finishes as well as furniture and other contents of your property.

Mold Abatement

Mold growth is a natural consequence of a house flood from a pipe break, roof leak, or water use in firefighting efforts. Mold re-infestation after initial cleanup efforts is virtually inevitable without professional intervention by mold abatement experts. Of course, widespread mold threatens human health. Our certified mold abatement specialists use the commercial equipment, tools, and chemical treatment solutions needed to remove all mold and eliminate the risk of re-infestation.

In addition to our role as a water, sewage, mold, soot, smoke, and fire damage restoration company, we also provide the Farr West Utah community with these disaster services:

- Biohazard Cleanup
- Crime Scene Cleanup
- Emergency Board Up

Why Choose Utah Flood Cleanup?

As a leading fire, mold, and water damage restoration company, our team of team-certified restoration specialists apply the most advanced technologies and industry best practices for remediation of fire, flood, and mold damage. Our team is RRP Certified, holds Certified Mold Professional certificates, Asbestos Contractor/Supervisor, and Asbestos Inspector certifications as well as IICRC, WTR, CDS, ASD, CMP, and RRP certifications.

- We adhere strictly to IICRC and S-500 guidelines.
- We offer 24/7 emergency assistance.

We provide a 2-year warranty on our workmanship.
