Types of Disaster Restoration Services Offered by Utah Flood Cleanup

We provide a full range of disaster cleanup, reconstruction, repair, and refinishing services for residential, commercial, and industrial property owners. The scope of our work includes all remedial work necessary to restore building structures, exteriors, and interiors impacted by a disastrous fire, sewage flooding, mold, or other destructive events.

Water Damage Restoration

Water damage due to roof leaks, sewer issues, ground gradient issues, foundation cracks, broken lines, etc., can cause flooding that leads to structural damage, electrical damage, extreme mold growth, and other losses. Blackwater flooding from sewage systems or gray water from sinks, tubs, or washer drain lines, etc., carry dangerous bacterial and fungal contamination that requires the very best water damage restoration company experts to protect health and safety.

Prompt water cleanup action is necessary to eliminate the extreme risks that pervade disaster environments in homes or commercial buildings. Our flood damage restoration specialists remove all water and damaged materials, meticulously decontaminate everything, thoroughly dry out the structure and anything that is to remain in it, and rebuild and refinish the property, fully restoring it to its pre-disaster condition or better.

Mold Damage Restoration

Flooding caused by a roof or plumbing leak, or undetected moisture from condensation or other causes can lead to the spread of mold. Thriving mold can threaten structures and impose an extreme health hazard. Building owners typically experience ongoing recurrences of mold growth even after repeated DIY attempts at mold eradication. Industrial mold abatement processes performed by experienced professionals are necessary to prevent mold from continuously reemerging.

Utah Flood Cleanup certified mold abatement specialists have the professional equipment, tools, processes, and expertise to eliminate all mold spores and conditions that promote re-growth, as is necessary to resolve the problem completely.

Fire Damage Restoration

Building fire disasters can leave areas of structures destroyed and unstable from floor joists to roof decks, electrical and plumbing lines disabled, surfaces layered with thick soot, and air filled with smoke odor. Living or workspaces become uninhabitable due to the extreme serious health and safety hazards in such disastrous conditions.

Utah Flood Cleanup fire damage restoration specialists have the industrial tools and equipment and professional experience necessary to correct all structural damage and impacted surfaces, utterly eliminate even the most intense odors from the building fire, fully restore structural strength, and meticulously complete all finish work.

Damage Restoration Services FAQ

Here are a few frequently asked questions about the kinds of disaster restoration services that [Utah Flood Cleanup](#) provides.

Do I really need a professional to restore my home?

Restoring a residential or commercial building damaged by fire, flood, or mold is quite different from regular home remodeling, repair, or heavy cleaning. Meeting restoration quality standards require specialized knowledge and experience, and the best available tools and equipment designed for drying structures, restoring surfaces, eliminating traces of smoke odor and residues, mold eradication, and other applicable industrial-grade processes.

How does what a professional restoration team does differ from a regular cleanup process?

Does my homeowner's insurance cover all damage restoration my house needs?

Common Misconceptions Regarding Damage Restoration Services

My carpets are dry. Doesn't that mean my entire house is now dry?

Carpets dry faster than other building materials. To discover whether or not a building meets the standard for being entirely dry and free from threat to structural integrity or risk of mold proliferation requires the use of moisture meters employed by experienced water damage restoration professionals.

Don't disaster restoration professionals charge more than they should and take advantage of the property owner's insurance carrier?

How do restoration companies handle the property insurance claims?
