Disaster Damage Restoration Company

Our disaster cleanup and property restoration specialists complete all phases of building restoration, from initial cleanup and decontamination to complete repairs or replacements throughout all affected areas of the property. Some services our [disaster restoration company](#) provides include:

Water Disaster Cleanup and Water Damage Restoration

Flooding from a broken pipe, roof leak, or sewage backup can damage or destroy wall supports, floor joists, subflooring, floor coverings, door and window frames, and other structures. Appliances, equipment, electronics, lighting fixtures, furniture, and decor can also be impacted. Your Marriott-Slaterville, UT [water damage restoration company](#) experts can assess the cleanup needs and property damage, secure the property, and initiate structural drying processes and disaster cleanup. We will then restore your building and contents to pre-disaster condition.

Fire Disaster Cleanup and Fire Damage Restoration

Fires destroy or damage thousands of properties in the U.S. each year, leaving buildings and personal property items damaged or destroyed. The smoke and soot damage and mold spread that can be expected to result add more difficulties for homeowners and businesses as they try to recover from the disaster. Utah Flood Cleanup [fire damage restoration company](#) uses the professional equipment, tools, and treatment solutions necessary to clean, decontaminate, dry, and restore damaged structures and personal property.

Sewage Cleanup, Decontamination, and Sewage Damage Restoration

The health hazard escalates very rapidly during a sewage line backup. It can quickly get out of control, with dangerous black water flooding your house as it continues backing up through the drains. It brings in with it many of the worst kinds of bacterial and fungal contamination. You may then be facing widespread water damage, mold, and mildew. Our team of disaster cleanup and restoration experts will perform exceptional emergency [sewage cleanup and decontamination](#), structural drying, and *complete* property restoration.

Mold Abatement and Mold Damage Restoration

Mold naturally spreads after a house flood or after water is used to fight a fire. It can be too tricky to prevent mold from reappearing without expert intervention. With professional mold abatement, the infestation cannot continue to reemerge and threaten occupants' health and the structural integrity of your home or office building. Our [mold abatement](#) specialists are certified and use only the kinds of commercial equipment and chemical treatment solutions that are best for thoroughly removing mold and preventing the risk of re-infestation.
