

Disaster Restoration Specialists, Centerville, Utah

 utahfloodcleanup.com/disaster-restoration-specialists-centerville-utah

Utah Flood Cleanup is a locally owned disaster restoration company. We are Utah's premier team of disaster cleanup professionals, and we specialize in fire, flood, and mold damage restoration. We work for *you*, our customer, not for your insurance company. As an advocate for our customers, we perform all disaster restoration services to meet industry standards, strictly adhering to IICRC S-500 and S-520 guidelines. We do not take shortcuts that sacrifice quality.

[24/7 Emergency Services](#)

Services Provided by Utah Flood Cleanup in Centerville, UT

Utah Flood Cleanup disaster restoration services are performed by top industry specialists using state-of-the-art technologies. Our experts provide *complete* residential and commercial disaster restoration services of the following kinds:

Water Damage Restoration

Flooding from a sewage overflow or clean water line break can cause structural and electrical systems damage, mold proliferation, and compromise the stability and lifespan of your home or business.

Utah Flood Cleanup specialists perform water cleanup, dry all structural components thoroughly, clean and decontaminate every affected spot of the premises with industrial-grade disaster restoration equipment, products, and processes.

We reconstruct destroyed or significantly damaged building structures, reinstall all functional systems, as needed, and meticulously restore finishes to restore all damaged areas of your property to their pre-flood condition or better.

Impeccable cleanup and property restoration due to flooding with raw sewage require experts equipped with the world's most advanced technology, diligently employing industry best practices. Our Utah Flood Cleanup team responds to emergency calls 24 hours, seven days per week. We fully restore every disaster-stricken property to pristine clean, fully functional, pre-flood condition.

Fire Damage Restoration

Extensive fire damage can damage or destroy large parts of a building structure, leaving hazardous construction debris areas. The entirety of the building remains blanketed with masses of soot. A home or business's overall structure can be compromised.

Our fire damage restoration specialists are equipped with expertise, highly skilled staff, and advanced equipment, tools, and materials. These are required to remove all damage, reconstruct destroyed and damaged building components, seal affected surfaces, refinish interiors and exteriors, and thoroughly eliminate soot and persistent smoke odors.

Mold Damage Restoration

Mold growth due to flooding from a roof or plumbing leak can damage structures and present a severe threat to health and safety. Spreading mold can become difficult to stop without professional mold abatement by specialists like our industry-leading Utah Flood Cleanup team.

Our certified mold remediation experts know how to eliminate *all* mold spores to prevent the typical ongoing re-emergence of mold that has been insufficiently treated after a flooding disaster. Using the world's most advanced processes, we obliterate mold and stop it from any future reemergence.

Frequently Asked Questions About Disaster Restoration Companies

Do I really need professional help for damage restoration?

Properly restoring a residential or commercial building following a fire or flood disaster, or due to excessive mold growth, requires knowledgeable and experienced professionals with the advanced technologies, and industrial-grade equipment, tools, materials, and processes needed for thorough drying of structures, treatment of surfaces, elimination of odors, and other work to achieve a thoroughly professional quality outcome.

How is what restoration professionals do different than regular cleanup?

Does homeowner's insurance cover disaster restoration services?

Some Misconceptions Regarding Disaster Restoration

If my carpet is dry, doesn't that mean my house is dry?

Carpets dry quicker than other construction materials. Determining that a building structure is completely dry is not usually possible from a surface inspection. Learning whether or not building structures meet the drying standard requires the use of moisture meters.

Damage restoration professionals overcharge and take advantage of the insurance company.

How are insurance claims for damage restoration services handled?
