

# Frozen Pipe Water Damage Restoration Service in Utah

---

[utahfloodcleanup.com/water-damage-restoration-from-frozen-pipes-in-utah](https://utahfloodcleanup.com/water-damage-restoration-from-frozen-pipes-in-utah)

With the temperature started to drop outside, it is important for everyone to make sure they are able to prevent frozen pipes. When water freezes, it expands. If water freezes in the pipes and expands, it is going to burst the pipes, leading to a major water leak when the ice thaws.

**The team from Utah Flood Cleanup is here to help you prevent frozen water pipes from impacting your home this holiday season.**

## How To Prevent Frozen Water Pipes

---

There are a few ways that everyone can prevent frozen water pipes this winter. Some of the top tips to keep in mind include:

- **Increase the Thermostat:** Nobody wants to spend more money on heat than they have to. On the other hand, turning the thermostat off completely can lead to frozen water pipes. Instead, try to keep the thermostat at a minimum of 55 degrees Fahrenheit, even when nobody is home. This will prevent water from freezing in the pipes.
- **Insulate the Pipes:** Some of the most common locations and what pipes freeze include the attic, the crawl space, and the exterior wall. Think about insulating them with snap-on foam or approved heat tape. Check out the instructions for manufacturers to make sure this is done properly.

- **Drip the Faucets:** While it can be annoying to deal with a dripping faucet, dripping the faucets while nobody is home and keep the water moving, making it hard for water to freeze in the pipes. This simple step can prevent stagnant water from freezing, leading to a busted pipe.

These basic tips can go a long way toward preventing water from freezing in the pipes this winter.

## What Happens When Your Frozen Pipes Burst?

---

If a pipe freezes and ruptures, this can lead to a serious situation. The good news is that homeowners' insurance can protect homeowners against damage from a busted pipe.

Homeowners insurance can cover some immediate expenses including:

- The amount of money required to access the busted pipe
- Money that is required to repair and restore property damage
- The cost to repair and restore the wall once the pipe itself has been fixed
- Living expenses if the family is unable to live in the home for an extended amount of time

At the same time, if the damage is allowed to linger, homeowners' insurance may balk at covering the entirety of the expenses. Therefore, it is important to reach out to train and water damage restoration professionals as quickly as possible. This is where the team from Utah Flood Cleanup can be helpful.
