What Causes Mold?

Mold feeds on moist materials and can reproduce by spreading mold spores. It usually develops after a plumbing leak or flooding, but mold can also spread by spores traveling through the air. Mold uses different kinds of materials as its food source, including paper, wood, cloth, carpeting, and food. If you have severe mold growth in your home, it can be difficult to completely remove. You will need a [professional mold removal company](#) to ensure all spores are eliminated and that further growth is curbed.

Contact us at Utah Flood Cleanup and receive top notch mold removal services. Our damage restoration specialists have the tools and equipment required to get the job done properly. We ensure complete mold removal so further problems do not develop.

Where Does the Problem Often Occur?

Mold can grow on any organic substance. Stored items that become damp from humidity or wet from seasonal flooding will begin to develop mold. Drywall in rooms that have flooded will develop mold as well. You may also see the problem on ceilings and floors. Other areas where mold can grow include carpeting, upholstery, books, cardboard storage boxes, clothing, and many other common materials found in basements and storage areas.

Mold problems in your home can cause a number of health issues, particularly in sensitive individuals such as infants and those with allergies. Nasal irritation, throat irritation, itchy eyes, coughing, and lung problems can occur. To prevent these problems, consult with us for professional mold removal services.

What is the Remediation Process?

Our mold removal and remediation specialist will first conduct a visual inspection to locate the mold growth. Through testing we will be able to confirm the type and extent of the mold growth. We will then begin disinfecting all contaminated surfaces and removing materials that cannot be treated. HEPA air filtration may be used to ensure that the air is free of mold spores. Finally, the area will be inspected to ensure that no mold is left behind to create further problems.

Utah Flood Cleanup is licensed and certified to provide quality mold removal services. We will make sure the problem is eliminated using safe methods and that further problems do not arise. Our team has the knowledge and experience to detect mold anywhere in your home, and will provide lab results and reports on remediation efforts.

Call today at (801) 876-5225 for a FREE phone consultation. Receive *quality mold removal* and remediation services at a great value.
